Services

Committed to Science, Committed to You™.
Product portfolios that align with your practice.

With our focus on contrast imaging, our product portfolios and services have been designed to work synergistically, enabling you to achieve optimal results for your practice — and your patients.

CT Suite
- Injectable and oral contrast media
- Virtual colonoscopy products
- Contrast delivery and reporting systems

MRI Suite
- Injectable contrast media
- Contrast delivery and reporting systems

Nuclear Medicine Suite
- Radiopharmaceuticals
- Rb-82 infusion system

Our offerings can be tailored to fit the unique needs of your practice in:
- Computed tomography (CT)
- Magnetic resonance imaging (MRI)
- Nuclear medicine
- Cardiac catheterization
- Interventional/diagnostic radiology

Interventional/Diagnostic Suite
- Injectable contrast media
- Gastrointestinal (GI) contrast media and devices
- Variable-rate contrast delivery system

Cardiac Catheterization Suite
- Injectable contrast media
- Contrast delivery and reporting systems
Product portfolios and services that meet the unique needs of your practice.

CT, Cardiac Catheterization & Interventional/Diagnostic Radiology, Injectable and Oral Contrast Media
BRACCO offers both ionic and non-ionic iodinated contrast media, as well as barium products for GI imaging, including:
- Isovue® (iopamidol injection)
- Gastrografin® (diatrizoate meglumine and diatrizoate sodium solution USP)
- Cholografin® Meglumine (iodipamide meglumine injection USP 52%)
- Cystografin®-Dilute (diatrizoate meglumine injection USP 18%)
- Cystografin® (diatrizoate meglumine injection USP 30%)
- Sinografin® (diatrizoate meglumine and iodipamide meglumine injection)
- Barium Contrast Media: Smoothie Readi-Cat® 2 (barium sulfate suspension, 2.1% w/v, 2.0% w/v), E-Z-Cat Dry® (barium sulfate suspension, Volumen® (1%W barium sulfate suspension, 0.1% w/v, 0.1% w/v), and Varibar® (barium sulfate suspension, 40% w/v)

Nuclear Medicine
BRACCO provides a select line of quality radiopharmaceuticals and associated products, including:
- CardioGen-82™ (Rubidium Rb 82 Generator), and CardioGen-B2 Infusion System™
- Choletec® (Kit for the Preparation of Technetium Tc 99m Mebrofenin)
- Kinevac® (Sircide for Injection)
- Chromitope Sodium® (Sodium Chromate Cr 51 Injection USP)
- Bracco A-C-D Solution Modified™ (Anticoagulant Citrate Dextrose Solution Modified) for use with Chromitope
- MDP-Bracco™ (Kit for the Preparation of Technetium Tc 99m Medronate)

GI Contrast and Devices/Virtual Colonoscopy (VC) Products
We offer a number of products designed to support the new application of VC for you and your patients, including:
- PROTOCO2L™ Automated CO2 Insufflator for VC
- Tagitol™ V (Barium Sulfate Suspension 40% w/v, 30% w/w)
- LoSo Prep™ (Magnesium Citrate Oral Solution USP, 1.745 Magnesium Citrate per fl oz, 4 Bisacodyl Tablets USP 5 mg each, 1 Bisacodyl Suppository USP 10 mg)

Important Safety Information

WARNING: NEPHROGENIC SYSTEMIC FIBROSIS
Gadolinium-based contrast agents increase the risk for nephrogenic systemic fibrosis (NSF) in patients with:
- Acute or chronic severe renal insufficiency (glomerular filtration rate < 30mL/min/1.73m2), or
- Acute renal insufficiency of any severity due to the hepato-renal syndrome or in the perioperative liver transplantation period.

In these patients, avoid use of gadolinium-based contrast agents unless the diagnostic information is essential and not available with non-contrast enhanced magnetic resonance imaging (MRI). NSF may result in fatal or debilitating systemic fibrosis affecting the skin, muscle and internal organs. Screen all patients for renal dysfunction by obtaining a history and/or laboratory tests. When administering a gadolinium-based contrast agent, do not exceed the recommended dose and allow a sufficient period of time for elimination of the agent from the body prior to any readministration.

As with all paramagnetic agents, caution should be exercised in patients with deoxygenated sickle erythrocytes and renal insufficiency with or without hepatic impairment. The possibility of a reaction, including serious, life threatening, or fatal, anaphylactic or cardiovascular reactions, or other idiosyncratic reactions, should always be considered, especially in those patients with a history of a known clinical hypersensitivity or a history of asthma or other allergic respiratory disorders.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see Full Prescribing Information including boxed WARNING. Please see the Full Prescribing Information for all products on the CD located in the pocket of this brochure. Please see other Important Safety Information located in the pocket of this brochure.

BRACCO, in partnership with ACIST®, designs and manufactures our EMPOWER line of injector systems, which offers both clinical and administrative support via our Extravasation Detection Accessory (EDA) and our injector Reporting Information System (IRS), and include:
- EmpowerCT® injectors with IRIS and EDA
- EmpowerMR® injectors with IRIS
- ACIST CV®
Services that demonstrate our commitment to your imaging practice.

At BRACCO, our CUSTOMER SERVICES demonstrate our commitment to you, while our SCIENTIFIC SERVICES demonstrate our commitment to science and the future of imaging technology.

We offer a highly personalized approach to doing business, rooted in a family-owned company.

BRACCO Customer Services:
- Specialized Sales Support
- Customer Services
- Application Specialists
- Contrast Protocol Optimization

BRACCO Scientific Services:
- Professional Services
- Education and Training
- Clinical Trial Programs
- Healthcare Economics
Solutions as unique as your practice.
